

Senior Java Engineer

Melbourne VIC

Engineering - Software (Information & Communication Technology)

Full time

\$140,000 - \$160,000 Inc Sup

Exciting Opportunity: Senior Java Engineer at Tier 1 Bank

Overview:

Join our esteemed engineering team and take on the role of Senior Java Engineer. Bring your critical thinking, technical innovation, and attention to detail to the table, becoming a trusted advisor to our team and stakeholders. You'll showcase your versatility, leadership qualities and enthusiasm to tackle new challenges across the full SDLC.

Requirements:

- 10 years of experience as a Java developer, preferably in the Banking or Finance industry.
- Proficiency in integration and microservice patterns.
- Experience with distributed, event-driven systems and messaging protocols such as Apache Kafka and IBM MQ.
- Familiarity with build and automation tools like Gradle, Jenkins, Python, Artifactory, Terraform, and SonarQube.
- Strong preference for experience with Java 11, Spring Boot, RDBMS (especially Postgres and Oracle), Webservices (REST/SOAP), Apache Camel, Docker, SCM (Git), BDD (JBehave/Cucumber), and Unit Testing (JUnit 5, Mockito).
- Established network and platform (*nix) skills, with a preference for Cloud hosting (AWS).
- Excellent communication skills to engage with stakeholders, including users and product owners.
- Interest in the entire application stack, including network, security, platform OS, and application code, with a strong desire to write code.
